

## Mean equivalised net income

[REMOVE](#) [1]

The mean equivalised net, or disposable income, is the mean of total income of all households, after tax and other deductions, that is available for spending or saving, divided by the number of household members converted into equivalised adults; household members are equalised or made equivalent by weighting each according to their age, using the so-called modified OECD equivalence scale.

### Data host:

Eurostat

### Unit of Measurement:

Euro (EUR)

### Link to Data:
