

Municipal waste generation — outlook from EEA

[REMOVE](#) [1]

The outlook indicator presents total municipal waste generation and by type of waste (paper and cardboard, glass, waste oils and used tires, packaging). It is expressed as index of waste generated in 2000. According to the definition from Eurostat municipal waste refers to waste collected by or on behalf of municipalities; the main part originates from households, but waste from commerce and trade, office buildings, institutions and small businesses is also included.
