

Employment rate, by highest level of education attained

[REMOVE](#) [1]

The indicator is calculated by dividing the number of employed people within age group 20-64 years having attained a specific level of education, by the total population of the same age group.

Contribution to the green economy:

Employment and education effect social justice, quality of life and economic sustainability and resilience; therefore directly impact Green Economy.

Cost of accessing data:

- [free of charge](#) [16]

Potential misinterpretation: Is the employment rate by education corresponding to the educational level within society?

Related Indicator: [Education attainment: Lower primary; Upper secondary; Tertiary](#) [17]

Potential misinterpretation: Is the employment indicator for the age group 20-64 performing well, but there are big differences between the specific age groups?

Related Indicator: [Unemployment rate, by age group](#) [18]

Potential misinterpretation: A high employment rate does not necessarily mean that the rate of newly created, unoccupied, or about to become vacant, posts is high.

Related Indicator: [Job vacancy rate](#) [19]

Potential misinterpretation: A high employment rate does not necessarily mean that employees are satisfied with their jobs.

Related Indicator: [Satisfaction with working conditions](#) [20]

The NETGREEN project has received funding from the European Union's Seventh Framework Programme for Research, Technological Development and Demonstration under the Grant Agreement no. 603877.
